

# Types of Shock

Use your text book to answer the questions.

(I'd give you the chapter and page number, but that would be making things too easy for you and enabling you, far be it from me to be an enabler...)

1. What is circulatory shock? 1 pt

2. From the many causes of circulatory failure, all result in what to the body? (and don't jump to death right away) ½ pt

3. What is cardiogenic shock? Include what it results from and its effect. 1½ pts

4. a. What is hypovolemic shock? Include what it results from and its effect. 1pt

b. What does "hypo" mean? What does "volemia" mean? 1pt

c. What can cause hypovolemic shock? 2 pts

5. a. What is neurogenic shock? Include what it results from and its effect. 1½ pts

b. What can cause neurogenic shock? 1½ pts

6. What is anaphylactic shock? Include what it results from and its effect. 1 pt

7. a. What is septic shock? Include what it results from and its effect. 1½ pts

b. What can cause septic shock? ½ pt
